Enquiries Welcome

Maintenance Free Forever: What does this mean?

We believe ColourFence is the best domestic fencing system in the world today. We don't believe that customers should spend their hard-earned money on inferior products like wood, plastic, or composites that will eventually rot, break down, fade, or distort in the weather. Meaning you don't need to stain, paint, repair, your fence, allowing you to spend more time enjoying your garden.

It doesn't need to dominate your garden either; you can grow plants against or all over it, with the peace of mind that you will never have to cut your beautiful plants down to access your fence.

Guaranteed For A Minimum of 25 Years: What does this mean?

Saving you money. Unlike our competitors you will not need to maintain or replace your fence for at least 25 years.

ColourFence won't warp, crack, shrink, rot, peel, break, or require staining or painting for at least 25 years, although we know it will last many more. Again, allowing you to spend more time enjoying your garden.

Our guarantee provides peace of mind with a sustainable, weather-resistant, fireproof product that effortlessly combines beauty and durability, transforming your garden into something stunning and reliable.

Fire Proof: What does this mean?

For yours and your family's safety ColourFence products are also fire proof, providing another layer of protection to your home. Unlike many of our competitors products, flames from wooden or composite fencing can spread into your home, garden and neighbours' property causing fire, smoke and hazardous fumes.

Storm Ready Fencing What does this mean?

Now we're experiencing climate change - severe winds and storms are becoming more common in many parts of the world and the UK is no exception. Wooden fencing products are often vulnerable to damage from these extreme weather conditions, leaving homes and gardens exposed to potential risks.

However, ColourFence is designed to withstand the harshest UK and continental weather conditions. Offering unparalleled durability and strength, making it a perfect solution for the increasing threat of severe weather conditions.

100% Recyclable Materials: What does this mean?

Steel, being infinitely recyclable, also aligns with modern environmental standards. This makes ColourFence not only a practical choice for homeowners but also a responsible one. The developers at Climar took pride in creating a product that would reduce waste and environmental impact, all while providing a superior fencing solution.

Our Ranges:

ColourFence | ColourRail | ColourGate | ColourShed

See what our customers say:

Why ColourFence?

**Operating For Over 21 Years
in the UK. Over 100,000
Fences Installed in
Residential Properties**

Here in the UK, fences certainly face some challenging weather conditions from extremes of heat and cold, to dust, rain, wind and hail.

COLORBOND® steel undergoes corrosion testing, durability testing, application testing (to ensure it can be used in a wide range of manufacturing applications) and outdoor exposure testing.

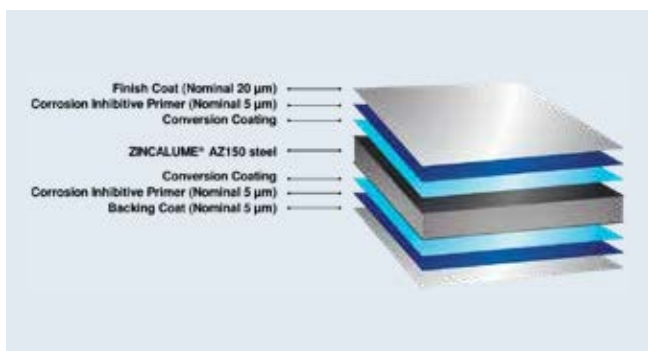

COLORBOND® steel is far more than just 'paint on steel'.

The base is coated in industry leading metallic coating to provide enhanced corrosion resistance.

A thin pretreatment layer is applied to optimise the adhesion of further coatings.

A corrosion inhibitive primer is baked onto the surface.

A topcoat of specially developed, exterior grade paint is baked on to provide resistance to chipping, flaking and blistering and to ensure the finish retains its look for longer.

The Fence That Repairs Itself

Even under the striking colour finish the unique Colorbond® has a Zinalume® layer.

Zinalume is an outstanding, anti-corrosion technology, meaning scratches won't rust!

When scratched, the ColourFence forms a waterproof layer made up of a combination of zinc and aluminium oxides. So even when chipped or damaged during its life in your garden, you won't see any rust!

*For alternative heights or widths, please speak to your local branch manager, or HO, to discuss bespoke options.

Why ColourFence Gate?

Strong, Secure and Built To Last

These lockable gates are made from the same COLORBOND® material as our ColourFence products. Meaning you get the same benefits for your gate as your ColourFence.

ColourFence Gate offers a unique combination of practicality and aesthetics. With its robust and durable construction, it provides an unparalleled level of security and protection for your garden while requiring no maintenance.

Maintenance Free Forever:

What does this mean?

We believe ColourFence is the best domestic fencing system in the world today. We don't believe that customers should spend their hard-earned money on inferior products like wood, plastic, or composites that will eventually rot, break down, fade, or distort in the weather. Meaning you don't need to stain, paint, repair, your fence, allowing you to spend more time enjoying your garden.

It doesn't need to dominate your garden either; you can grow plants against or all over it, with the peace of mind that you will never have to cut your beautiful plants down to access your fence.

What Comes With A ColourFence Gate:

ColourFence Gate comes with an elgate lock, a handle and pair of hinges as a standard. However, you can choose to upgrade your elgate lock to either a magnetic latch or deluxe lock for additional peace of mind and security to your home.

What Designs and Colours Are Available For ColourFence Gate:

There are six stylish colours to choose from and you can even mix and match components to create your very own look and style. You can even pick a matching or contrasting design from Traditional Plain or Trellis to Contemporary Trellis designs. So, whether you prefer the traditional look of Green or Brown plain fence gate, or a Grey contemporary trellis gate, there is a ColourFence Gate as individual as you.

Our Ranges:

ColourFence | ColourRail | ColourGate | ColourShed

*For alternative heights or widths, please speak to your local branch manager, or HO, to discuss bespoke options.

Why ColourFence Deluxe Gate?

ColourFence Deluxe Gate are made from the same COLORBOND® material as our ColourFence products. Meaning you get the same benefits for your gate as your ColourFence.

These gates are custom-built to size and are often chosen by our customers as the next level up from a standard gate. ColourFence Deluxe Gates are solid panel gates, which offer an even higher level of security and safety to your home, as well as an aesthetic finish which is unrivalled.

Maintenance Free Forever:

What does this mean?

We believe ColourFence is the best domestic fencing system in the world today. We don't believe that customers should spend their hard-earned money on inferior products like wood, plastic, or composites that will eventually rot, break down, fade, or distort in the weather. Meaning you don't need to stain, paint, repair, your fence, allowing you to spend more time enjoying your garden. It doesn't need to dominate your garden either; you can grow plants against or all over it, with the peace of mind that you will never have to cut your beautiful plants down to access your fence.

What comes with a ColourFence Deluxe Gate

ColourFence Deluxe Gates comes with a pre-made gate, with a set of 2 gate handles. We have a variety of gate accessories such as locks, hinges and drop bolts to compliment your Deluxe Gate and preferences.

COLORBOND® steel is far more than just 'paint on steel'.

The base is coated in industry leading metallic coating to provide enhanced corrosion resistance. A thin pretreatment layer is applied to optimise the adhesion of further coatings. A corrosion inhibitive primer is baked onto the surface. A topcoat of specially developed, exterior grade paint is baked on to provide resistance to chipping, flaking and blistering and to ensure the finish retains its look for longer.

Why ColourRail?

ColourRail is the perfect addition to the front of your home, without obstructing your view or light coming into your home.

Maintenance Free Forever: What does this mean?

We believe ColourRail is the best domestic railing system in the world today. We don't believe that customers should spend their hard-earned money on inferior products like wrought iron that will eventually rust or corrode in the weather. Meaning you don't need to stain, paint, repair, your railing, allowing you to spend more time enjoying your garden.

Guaranteed For A Minimum of 25 Years: What does this mean?

Saving you money. Unlike our competitors you will not need to maintain or replace your ColourRail for at least 25 years.

ColourRail won't rust or corrode, or require staining or painting for at least 25 years, although we know it will last a lot longer. Allowing you to spend more time enjoying your garden. Our guarantee provides peace of mind with a sustainable, weather-resistant, fireproof product that effortlessly combines beauty and durability, transforming your garden into something stunning and reliable.

Fire Proof: What does this mean?

For yours and your family's safety ColourRail products are also fire proof, providing another layer of protection to your home. Unlike many of our competitors products, flames from wooden or composite fencing can spread into your home, garden and neighbours' property causing fire, smoke and hazardous fumes.

ColourRail In Detail:

ColourRail is a superb railing solution made with the highest quality 16mm galvanized steel tube, and a sturdy 25x40mm frame. Our railings can be mounted freestanding using the appropriate posts, between existing pillars or on top of walls depending on your garden.

ColourRail is spray coated with our high-quality Azko Nobel architectural grade powder coat. Meaning you can choose 7 standard colours or over 300+ bespoke RAL colours, while maintaining the same structurally sound railing solution for over 25 years. Or choose our no powder coated, or galvanised, option for our budget range.

Our Ranges:

ColourFence | ColourRail | ColourGate | ColourShed

*For alternative heights or widths, please speak to your local branch manager, or HO, to discuss bespoke options.

Why ColourShed?

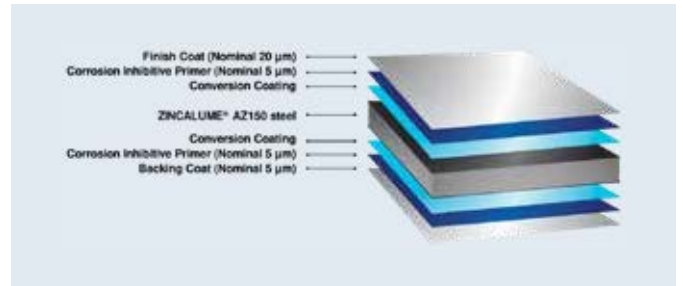

The Maintenance Free Practical Storage Solution

As ColourFence has gained in popularity, our customers have been keen to extend the benefits to the rest of their garden.

Maintenance Free Forever: What does this mean?

We believe that customers should not have to spend their hard-earned money on inferior products like wood, plastic, or composites that will eventually rot, break down, fade, or distort in the weather. Meaning you don't need to stain, paint, repair, your fence, allowing you to spend more time enjoying your garden.

COLORBOND® steel undergoes corrosion testing, durability testing, application testing (to ensure it can be used in a wide range of manufacturing applications) and outdoor exposure testing.

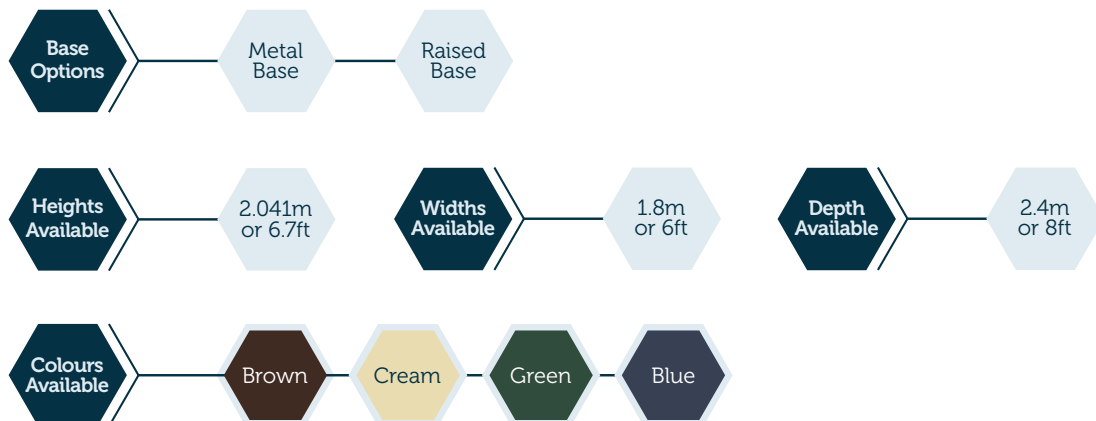

COLORBOND® steel is far more than just 'paint on steel'.

The base is coated in industry leading metallic coating to provide enhanced corrosion resistance. A thin pretreatment layer is applied to optimise the adhesion of further coatings. A corrosion inhibitive primer is baked onto the surface. A topcoat of specially developed, exterior grade paint is baked on to provide resistance to chipping, flaking and blistering and to ensure the finish retains its look for longer.

The Fence That Repairs Itself

Even under the striking colour finish, the unique Colorbond® has a 'Zincalume' layer. Zincalume is an outstanding, anti-corrosion technology, meaning scratches won't rust! When scratched, the ColourShed forms a waterproof layer made up of a combination of zinc and aluminium oxides. So even when chipped or damaged during its life in your garden, you won't see any rust!

Fire Proof Fencing

With its sturdy construction and advance manufacturing techniques. Our ColourFence products are not only wind resistant up to 130mph, but they're also fire resistant, too.

ColourFence offers greater protection to people's homes against fires than other alternative materials because of its non-combustibility. This makes the steel fencing a perfect

solution for businesses as well as homes, which is why we offer ColourFence commercially as well as to residential properties. As you can see from the fire hazard properties index – our product is at zero for each risk factor – keeping you both safe, and secure in the knowledge you've made the right choice.

FIRE HAZARD PROPERTIES	TEST EVALUATION AND RATING
Simultaneous determination of ignitability, flame propagation, heat release and smoke release (AS/NZS 1530.3:1999 (R2016))	Ignitability index (0 – 20) 0 Spread of flame index (0 – 10) 0 Heat evolved index (0 – 10) 0
_NCC non-combustible material concessions (NCC 2019; AS/NZS 1530.3:1999 (R2016))	Smoke developed Index (0 - 10) 2 National Construction Code, Building Code of Australia 2019; Volume 1 Part C1.9.e, and Volume 2: Part 3.7.1.1.e - May be used wherever a non combustibile material is required. AS/NZS 1530.3:1999 (R2016)
Combustibility test for materials (steel substrate) (AS 1530.1-1994 (R2016))	AS 1530.1-1994 (R2016) – Not deemed combustibile (steel substrate)
Resistant to heat Exposure 100°C continuous (500 hrs)	ASTM D2244-16 (Colour) – Colour change: ΔE CIElab 2000: ≤3 units.

FAQ's

Q: Do I need to paint the fence?

A: No, all you need to do is wash the fence down to maintain it.

Q: What size are your fence panels?

A: Our standard panels are 2.35 m wide. But we have other width options available upon request.

Q: Do you have various heights available?

A: We do have various heights starting from 0.9m/3ft and can go up to 2.1m/6.8ft high.

Q: Do you do free quotations?

A: We do, this can either be done via our head office for commercial, supply only and trade team, or by your local branch for residential.

Q: Will someone come to do a site survey before I decide?

A: Yes, we will arrange a site survey before confirming a quote.

Q: What areas do you cover?

A: We have branches across the UK. Or contact us at head office for supply only options.

Q: Will the fence rust?

A: No, our fences will not rust, warp, crack, rot, peel or break. Even more, ColourFence has a Zinalume layer – meaning if your fence gets scratched, the anti-corrosion layer will prevent the scratched area from rusting.

Q: Does the fence have a warranty?

A: Yes, our fences are guaranteed for 25 years, Maintenance Free.

Q: What colours do you have?

A: We have a range of colours for fences including Green, Blue, Cream, Brown and Grey. Our railings have 7 standard colours and over 300 bespoke colours.

Q: Do you do gates?

A: Yes, we do. We can fit ColourFence Gates for either pedestrian access or driveways as well as ColourRail gates.

Q: Can I attach wire to the fence to grow flowers?

A: You can but we advise not to screw the metal in case this breaks the seal which may cause rusting.

Q: Do you do sloped fencing?

A: Yes, our fully trained team will survey an installation and advise the best solution for your needs.

Q: Can you install fencing at odd angles?

A: We can undertake the standard 90 degree return for installations along with 45 degree returns for fence installations.

Q. Do you offer full product, survey and installation training?

A. We do, this can be done either at your own premises or at our Head Office in Newport. Please allow a minimum half day.
